1. Introduction

Konica Minolta Environmental Policy

The Konica Minolta Group aims to promote sustainable development and profitable growth. We integrate environmental, economic and social perspectives into our business strategies so that our business activities are implemented in harmony with human lives and with the environment in all aspects.

Our concept is to make steady progress toward resolution of environmental challenges based on quantitative measurement and analysis of reliable data in regard to environmental performance and impact. This basic concept is demonstrated in the following affirmation:

"Management Based On Facts"

1. Working toward a sustainable society as a global citizen

In response to the call for a sustainable society, we will conduct business activities from the perspective of ongoing enhancement of performance in environmental preservation, economic growth and social responsibilities (ethics). Every one of us will enhance its knowledge and awareness on the environment, economies and societies on a global scale and act with responsibility in pursuit of a sustainable society.

2. Compliance with laws and other requirements

We will comply with legal requirements in respective countries and regions, as well as our Group standards. In addition, we will respect, in an equitable manner, expectations of our stakeholders and consensus in the international community.

3. Consideration for the environment throughout the entire life cycle of products and services

We are committed to reducing the environmental load in all stages throughout the entire life cycle of products and services, recognizing that responsibility for a product rests with its manufacture.

4. Initiatives to counter global warming

We will continuously reduce greenhouse gas emissions that derive from our business activities from the perspective of the life cycle of our products and services throughout the entire Group, recognizing that global warming is one of the most important world issues.

5. Initiatives toward a recycling-oriented society

We are always reviewing what we can do as a corporate citizen in order to create recycling-oriented society while striving for minimizing consumption of natural resources and promoting "Zero Waste Emission" activities. In addition, we will accelerate initiatives for the recovery and recycling of end-of-life products and packaging materials.

6. Prevention of chemical pollution and minimization of potential risks to the environment

We will take every countermeasure for preventing chemical pollutions, recognizing that chemical substances can impose significant impact on human health and safety and the environment. At the same time, we will continuously suppress use of chemicals and reduce discharge volume in order to minimize environmental risks.

7. Promotion of information disclosure

We will execute accountability to all the stakeholders by actively disclosing environmental information and ensuring risk communication. We will as well make every effort to accomplish our commitment to the societies. Our Environmental Policy is to be disclosed to the public.

8. Establishment of environmental objectives and targets

We establish and administer environmental objectives, targets, and management programs to translate this Environmental Policy into reality. We will continuously review such objectives, targets and programs for further improvement of our environmental performance.

2. Purpose of green procurement

The purpose of green procurement is to accurately obtain information on Konica Minolta's "substances to manage" from suppliers, procure materials that include no hazardous substances for Konica Minolta products, and appropriately manage information on chemicals to be transmitted to the supply chain and to consumers.

3. Scope

Konica Minolta's green procurement applies to the following articles that the Konica Minolta Group procures from suppliers:

- Parts, materials, unit parts, and products
(including lubricant, grease, and solder contained in the above as well as dried or hardened coatings, adhesives, etc.)
- Packing materials (to end users)

The following chemicals procured from suppliers by the Konica Minolta Group are to be surveyed differently as chemicals:

- Chemicals (toners, inks, and supplementary materials for service, etc.) sold by the Konica Minolta Group as well as their constituent materials
- Raw materials and supplementary materials (grease, coating, adhesives, etc.) used in the Konica Minolta Group's production sites

4. Definition of terms

Substances to manage: Chemical substances that have been determined to require management at Konica Minolta. ChemSHERPA managed substances and all chemical substances and the following prohibited and scheduled prohibited substances and reportable substances for equipment products.

See the chemSHERPA list of substances to manage on the following website.

<https://chemsherpa.net/chemSHERPA/>

Prohibited substances: Among the controlled substances, substances whose inclusion is prohibited by laws and regulations shown in Attached Table 1 and substances whose inclusion is restricted by Konica Minolta's voluntary efforts.

Scheduled prohibited substances: Among the controlled substances, those that are under consideration for prohibition under treaties, laws, regulations, etc., and that Konica Minolta plans to prohibit within two years are shown in Appendix 1.

Reportable substances: Among the substances to manage, those substances (shown in Appendix 1) that should be reduced depending on the situation and, where included in parts, for which information should be provided in accordance with laws.

Homogeneous material: Based on the definition in EU RoHS (2011/65/EU), a material that cannot be mechanically separated into different materials. Examples include various types of plastic, ceramic, glass, metal, alloy, paper, board, resin, coating, paint, and plating.

Example: electrolytic capacitor

Source: Material Composition Survey and Response Manual (published: Japan VT62474)

Exemptions: Based on the definition in EU RoHS (2011/65/EU), uses that are temporarily permitted in an application where substitution is technically impracticable. The applications, limitations on the amount used, and periods of validity are established in detailed for each substance.

Intentional addition: The condition of having been added for some purpose, such as giving a product a certain property.

5. Request for supplier environmental management system

Suppliers should establish an environmental management system (EMS) at factories where suppliers produce or manufacture items for the Konica Minolta group. Specifically, this includes:

- Establishment and maintenance of environmental management organization and system in accordance with ISO14001, EMAS and other standards.
- Obtainment of ISO14001 certification, etc.
- Execution and record of required environmental management such as environment of factory and labor
- Reflection of Konica Minolta requests in management and production
- Securing of appropriate traceability from raw materials and parts to finished products
- Management of substances regulated under the Montreal Protocol
- Effort to reduce power consumption, water, production loss, CO₂
- Corporate effort towards zero-emission and recycling

Established system and performed management should be properly documented and recorded.

6. Requests regarding delivered products

1) Requirements for chemical substances in products (CiP)

- Regarding prohibited substances in equipment products, delivered items must not contain more than the control standards, except for exempted applications.
- Information is to be provided to Konica Minolta regarding substances to manage.
- For scheduled prohibited substances, we may request a replacement before the scheduled prohibited date.

The prohibited substances and control limit/threshold applied differ depending on the application. In addition, shown below are prohibited substances and management standards that only applied to products if the Business Technologies Business.

Products of the Business Technologies Business	<ul style="list-style-type: none">• Business solutions (multi-functional peripherals, laser printers, filing devices, fax machines, software/peripheral devices)• Production prints (digital printing systems)
--	---

Check Appendix 1 for details.

Due to requirements from eco-labels or customers, monitoring and/or restrictions might be applied individually to substances not included among the substances to manage. Please check with a Konica Minolta representative regarding specific requirements for the parts and materials you supply.

2) Basis of determination of inclusion status

Determine inclusion status and content of survey target chemicals on a rational and chemical basis. Specifically:

- chemSHERPA(AI,CI)
- Design value, prescription value
- Analytical value
- Public material standard such as JIS
- Material certification document such as MIL sheet, SSDS
- Manufacturer's catalog data for purchased commercial goods

Determine using one or a combination of the above.

If an analysis value is used as the basis of determination, consider maldistribution and other statistical variation between lots, within lots, and parts of an item.

3) Chemical substances in products (CiP) survey

Konica Minolta will email you a survey request for covered items. After receiving the survey request email, access the Konica Minolta Green Procurement System and respond after checking the details of the request.

<https://green3.konicaminolta.net/sigma2/>

The survey response format for CiP is based on the chemSHERPA-AI File. Composition information is required. Information on compliance judgment is optional.

Follow the chemSHERPA usage rules when preparing the chemSHERPA-AI File.

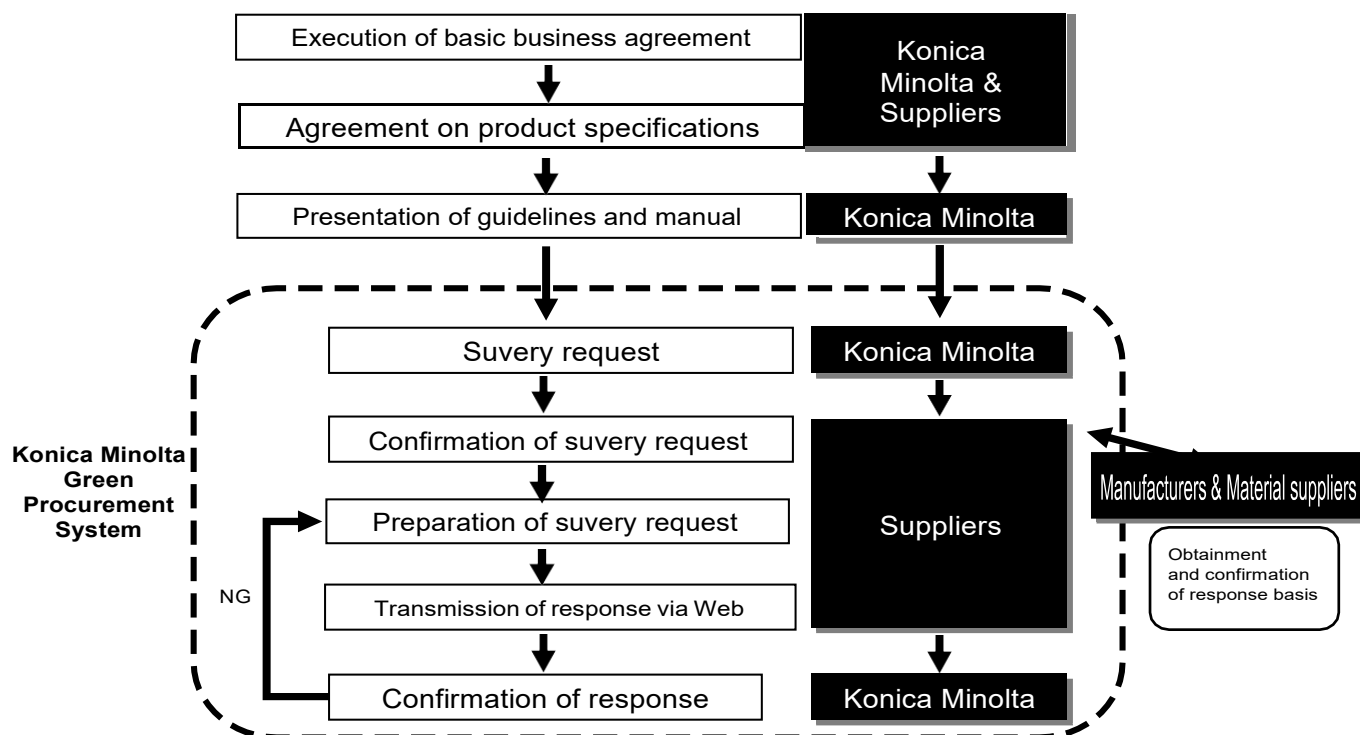

See the following website for details.

<https://chemsherpa.net/chemSHERPA/>

For product packaging material, submit a Declaration of Conformity on Chemical Substances in Packaging Material in addition to the chemSHERPA-AI File.

A different survey method and/or response format might be requested depending on the business division or item. Evidence such as measured results might need to be submitted.

Please check with a Konica Minolta representative for details.

7. Requests when changing a response

If a change in an already submitted response occurs due to the following reasons, please notify a Konica Minolta representative promptly.

① Changing parts

- at changing design
- at changing manufacturing conditions (such as materials, equipment, and so on)
- at changing commercial distribution (supplier, trading company, manufacturer of raw materials, and so on)

② Addition of new prohibited substances

- When new prohibited substances are added to “List of Prohibited/reportable substances for Konica Minolta products”

13(b)-(II)	Cadmium in striking optical filter glass types; excluding applications falling under point 39(b) of this annex	Requested for Renewal (Former Date 2021.7.21)				
13(b)-(III)	Cadmium and lead in glazes used for reflectance standards	Requested for Renewal (Former Date 2021.7.21)				
15	Lead in solders to complete a viable electrical connection between semiconductor die and carrier within integrated circuit flip chip packages		Requested for Renewal (Former Date 2021.7.21)	Requested for Renewal (Former Date 2023.7.21)	Requested for Renewal (Former Date 2024.7.21)	Requested for Renewal (Former Date 2024.7.21)
15(a)	Lead in solders to complete a viable electrical connection between the semiconductor die and carrier within integrated circuit flip chip packages where at least one of the following criteria applies: - a semiconductor technology node of 90 nm or larger; - a single die of 300 mm ² or larger in any semiconductor technology node; - stacked die packages with die of 300 mm ² or larger, or silicon interposers of 300 mm ² or larger.	Requested for Renewal (Former Date 2021.7.21)				
17	Lead halide as radiant agent in high intensity discharge (HID) lamps used for professional reprography applications				2024.7.21 Expired	2024.7.21 Expired
18(b)	Lead as activator in the fluorescent powder (1 % lead by weight or less) of discharge lamps when used as sun tanning lamps containing phosphors such as BSP (BaSi ₂ O ₅ :Pb)	Requested for Renewal (Former Date 2021.7.21)	Requested for Renewal (Former Date 2021.7.21)		2024.7.21 Expired	2024.7.21 Expired
18(b)-I	Lead as activator in the fluorescent powder (1 % lead by weight or less) of discharge lamps containing phosphors such as BSP (BaSi ₂ O ₅ :Pb) when used in medical phototherapy equipment	Requested for Renewal (Former Date 2021.7.21) Applies to categories 5, excluding applications covered by entry 34 of Annex IV.				
21	Lead and cadmium in printing inks for the application of enamels on glasses, such as borosilicate and soda lime glasses				2024.7.21 Expired	2024.7.21 Expired
24	Lead in solders for the soldering to machined through hole discoidal and planar array ceramic multilayer capacitors	Requested for Renewal (Former Date 2021.7.21)	Requested for Renewal (Former Date 2021.7.21)	Requested for Renewal (Former Date 2023.7.21)	Requested for Renewal (Former Date 2024.7.21)	Requested for Renewal (Former Date 2024.7.21)
25	Lead oxide in surface conduction electron emitter displays (SED) used in structural elements, notably in the seal frit and frit ring				2024.7.21 Expired	2024.7.21 Expired
29	Lead bound in crystal glass as defined in Annex I (Categories 1, 2, 3 and 4) of Council Directive 69/493/EEC	Requested for Renewal (Former Date 2021.7.21)			2024.7.21 Expired	Requested for Renewal (Former Date 2024.7.21)
30	Cadmium alloys as electrical/mechanical solder joints to electrical conductors located directly on the voice coil in transducers used in high-powered loudspeakers with sound pressure levels of 100 dB (A) and more				2024.7.21 Expired	2024.7.21 Expired
31	Lead in soldering materials in mercury free flat fluorescent lamps (which e.g. are used for liquid crystal displays, design or industrial lighting)				2024.7.21 Expired	2024.7.21 Expired
32	Lead oxide in seal frit used for making window assemblies for Argon and Krypton laser tubes	Requested for Renewal (Former Date 2021.7.21)	Requested for Renewal (Former Date 2021.7.21)		Requested for Renewal (Former Date 2024.7.21)	2024.7.21 Expired
33	Lead in solders for the soldering of thin copper wires of 100 µm diameter and less in power transformers				2024.7.21 Expired	2024.7.21 Expired
34	Lead in cermet-based trimmer potentiometer elements	Requested for Renewal (Former Date 2021.7.21)	Requested for Renewal (Former Date 2021.7.21)	Requested for Renewal (Former Date 2023.7.21)	Requested for Renewal (Former Date 2024.7.21)	2024.7.21 Expired
37	Lead in the plating layer of high voltage diodes on the basis of a zinc borate glass body				2024.7.21 Expired	2024.7.21 Expired
38	Cadmium and cadmium oxide in thick film pastes used on aluminium bonded beryllium oxide				2024.7.21 Expired	2024.7.21 Expired
39(a)	Cadmium selenide in downshifting cadmium-based semiconductor nanocrystal quantum dots for use in display lighting applications (< 0,2 µg Cd per mm ² of display screen area)	2025.11.21	2025.11.21	2025.11.21	2025.11.21	2025.11.21
39(b)	Cadmium in downshifting semiconductor nanocrystal quantum dots directly deposited on LED semiconductor chips for use in display and projection applications (< 5 µg Cd per mm ² of LED chip surface) with a maximum amount per device of 1 mg	2027.12.31	2027.12.31	2027.12.31	2027.12.31	2027.12.31

		Category 1-7,10	Category 8,9		Category 11
		medical devices and monitoring and control instruments	in vitro diagnostic medical devices	industrial monitoring and control instruments	
41	Lead in solders and termination finishes of electrical and electronic components and finishes of printed circuit boards used in ignition modules and other electrical and electronic engine control systems, which for technical reasons must be mounted directly on or in the crankcase or cylinder of hand-held combustion engines (classes SH:1, SH:2, SH:3 of Directive 97/68/EC of the European Parliament and of the Council (1))			2024.7.21 Expired	
42	Lead in bearings and bushes of diesel or gaseous fuel powered internal combustion engines applied in non-road professional use equipment: with engine total displacement ≥ 15 litres; or with engine total displacement < 15 litres and the engine is designed to operate in applications where the time between signal to start and full load is required to be less than 10 seconds; or regular maintenance is typically performed in a harsh and dirty outdoor environment, such as mining, construction, and agriculture applications.				Requested for Renewal (Former Date 2024.7.21) Applies to category 11, excluding applications covered by entry 6(c) of this Annex.
43	Bis(2-ethylhexyl) phthalate in rubber components in engine systems, designed for use in equipment that is not intended solely for consumer use and provided that no plasticised material comes into contact with human mucous membranes or into prolonged contact with human skin and the concentration value of bis(2-ethylhexyl) phthalate does not exceed: (a) 30 % by weight of the rubber for (i) gasket coatings; (ii) solid-rubber gaskets; or (iii) rubber components included in assemblies of at least three components using electrical, mechanical or hydraulic energy to do work, and attached to the engine. (b) 10 % by weight of the rubber for rubber-containing components not referred to in point (a). For the purposes of this entry, "prolonged contact with human skin" means continuous contact of more than 10 minutes duration or intermittent contact over a period of 30 minutes, per day.				2024.7.21 Expired
44	Lead in solder of sensors, actuators, and engine control units of combustion engines within the scope of Regulation (EU) 2016/1628 of the European Parliament and of the Council (*), installed in equipment used at fixed positions while in operation which is designed for professionals, but also used by non-professional users				Requested for Renewal (Former Date 2024.7.21)
45	Lead diazide, lead styphnate, lead dipicramate, orange lead (lead tetroxide), lead dioxide in electric and electronic initiators of explosives for civil (professional) use and barium chromate in long time pyrotechnic delay charges of electric initiators of explosives for civil (professional) use.				Requested for Renewal (Former Date 2026.4.20)
46	Cadmium and lead in plastic frames containing recycled rigid PVC for electrically-electronic windows and doors (from 28 May 2026, rigid PVC recycled from electrically-electronic windows and doors can only be used for the production of new products).				2028.5.28
